Tender No. BOK/HO/Proc/Compliance/IT/08/feb/2020.

Scope of Work

To comply with SBP Regulations for Payment Card Security a solution is required for Fraud Resolution Management (FRM) mechanism to assess, monitor, review and respond different types of frauds and complaints. The solution for transaction monitoring and fraud investigations may have at least, but NOT LIMITED TO, the following features.

- The solution should be capable of real-time monitoring of online transactions, data, events and customer accounts across multiple channels for identification and response to any threat of fraud attempts.
- The solution should be capable to generate alerts immediately upon detection of any anomaly or trend that leads to fraud.
- The alerts should be communicated via different channels such as onscreen display, email, SMS etc.
- The solution should be able to easily integrate with BOK systems.
- The solution should have various use cases already built-in to the system as per prevailing threats and fraud schemes.
- These use cases should be customizable in an easy manner by the authorized user as per BOK requirements.
- The solution should have capability to define new custom use cases in an easy manner preferably through GUI drag and drop capability by an authorized user.
- The solution should have capability to identify fraudulent transactions on different parameters such as but not limited to, geographical location, time of transaction, amount of transaction, frequency of transactions, channel of transaction etc.
- Upon detection, the solution should be able to stop the attack or activity leading to fraud.
- Authorized user should be able to take immediate action upon alert such as blockage of card or account to prevent subsequent damages by using the same system.
- The solution should have artificial intelligence capability in order to evolve for identification of unknown attacks and fraud attempts.
- The solution should be able to process high number of transactions efficiently.
- The solution should have extensive reporting mechanism including audit reports with customization ability.
- New reports can be added by authorized user through easy to use mechanism.
- Pending or outstanding alerts should be shown in queue.
- The solution should have user management mechanism by which user can be assigned rights and permissions based on job's roles and responsibilities.
- The solution should be scalable to cater BOK's future needs.
- The solution provider is required to deliver comprehensive training to BOK's related staff.
- The solution provider is also required to formulate and deliver related processes and procedures as per BOK's environment.
